

"Pilot Plant Indicated"

You are invited to the opening of Tor-Magnus Lundeby's solo exhibition & Carbon 12's one year anniversary on Monday the 30th of November from 20:00

"Carbon 12 Dubai, proudly presents the works of Norwegian painter Tor-Magnus Lundeby, in his first solo show in The Middle East, "Pilot Plant Indicated". With Lundeby's truly eccentric style, "Pilot Plant Indicated" promises to show new territory in the field of painting. With influences ranging from ancient maps to Utopian architecture, and the artist's habit of sampling and re-arranging elements like a DJ. The exhibition is destined to become a ride: from the symbiosis of mankind and nature, to the urban landscapes of tomorrow, from sentimental retrospection of modern life to enthusiastic flashes of futuristic scenarios. "Pilot Plant Indicated" is a blueprint of a metropolis unknown, a map to a world yet to be discovered."
